WORKING WITH CONSTRAINTS

Hemanth kumar,A

Find the Solution for the following:

1. Add a table-level PRIMARY KEY constraint to the EMP table on the ID column. The constraint should be named at creation. Name the constraint my_emp_id_pk.

```
ALTER TABLE EMP ADD CONSTRAINT my_emp_id_pk PRIMARY KEY (ID);
```

Object Type **TABLE** Object **EMPSS**

Table	Column	Data Type	Length	Precision	Scale	Primary Key	Nullable	Default	Comment
<u>EMPSS</u>	<u>NAME</u>	VARCHAR2	50	-	-	-	✓	-	-
	<u>ID</u>	NUMBER	22	-	-	1	-	-	-
1 - 2									

2. Create a PRIMAY KEY constraint to the DEPT table using the ID colum. The constraint should be named at creation. Name the constraint my_dept_id_pk.

```
ALTER TABLE DEPT ADD CONSTRAINT my_dept_id_pk PRIMARY KEY (ID);
```

Object Type **TABLE** Object **DEPTS**

Table	Column	Data Type	Length	Precision	Scale	Primary Key	Nullable	Default	Comment
<u>DEPTS</u>	<u>NAME</u>	VARCHAR2	50	-	-	-	✓	-	-
	<u>ID</u>	NUMBER	22	-	-	1	-	-	-
1 - 2									

3. Add a column DEPT_ID to the EMP table.

```
ALTER TABLE EMPSS  
ADD DEPT_ID NUMBER;
```

Object Type **TABLE** Object **EMPSS**

Table	Column	Data Type	Length	Precision	Scale	Primary Key	Nullable	Default	Comment
<u>EMPSS</u>	<u>NAME</u>	VARCHAR2	50	-	-	-	✓	-	-
	<u>ID</u>	NUMBER	22	-	-	1	-	-	-
	<u>DEPT_ID</u>	NUMBER	22	-	-	-	✓	-	-
1 - 3									

Add a foreign key reference on the EMP table
that ensures that the employee is not assigned to nonexistent deparment. Name the constraint

```
ALTER TABLE EMPSS
ADD CONSTRAINT my_emp_dept_id_fk
FOREIGN KEY (DEPT_ID)
REFERENCES DEPTS(ID);
```

4. Modify the EMP table. Add a COMMISSION column of NUMBER data type, precision 2, scale 2. Add a constraint to the commission column that ensures that a commission value is greater than zero.

```
ALTER TABLE EMP ADD COMMISSION NUMBER(2,2);
```

[illegible]

```
ALTER TABLE EMP ADD CONSTRAINT chk_commission_positive CHECK (COMMISSION > 0);
```

[illegible]
